## DIRECTORS' NOTES

What each of perceives as truth helps shape our sense of right and wrong. We all like to think that we would choose what is "right" over what is easy. But determining what is "right" can be elusive. When other people in our lives, like the characters in the play, confront us with their own perceptions of truth, denial may blind us to a larger truth.

Or we may accept the challenge to examine our most deeply held beliefs and arrive at a truer vision of who we are and what is right.
